

WEBINAR PROGRAM

2011-12 Interest Survey

Topics: prioritize that ten topics that are of most interest to you by numbering them from 1-10:

- Trauma treatment planning: what to do when?
- Applying the neuroscience research to trauma treatment challenges
- Working with the bodily and somatic effects of trauma
- Waking up the frontal lobes: top-down management
- Modulating a dysregulated nervous system
- Integrating newer trauma treatments into traditional talking therapy
- Working with self-harm and suicidality
- Addictions, eating disorders, and trauma
- Working with children and adolescents and their families
- Traumatic transference and countertransference
- Disorganized attachment and its implications for treatment
- Working with Borderline and Narcissistic Personality Disorders
- Working with dissociation and dissociative disorders
- Treatment frame and boundaries in trauma work
- Memory processing: what do we process? How much is 'enough'?
- Working with ego states
- Working with shame and self-loathing
- Chronic depression
- Resistance and conflict in the psychotherapy
- Other: _____
